

Plant*SF Noe Valley Uplands Sidewalk Demonstration Gardens

Plant List (5/15/2011)

Plant*SF is pleased to announce the completion of sidewalk-to-garden conversions at five properties in Noe Valley. This project received funding support from the SFPUC Urban Watershed Grant via the 2011 San Francisco Community Challenge Grant and in partnership with the property owners who maintain the garden. The gardens were designed to reduce stormwater loads on the combined sewer system by diverting rain into the ground to nourish plants, enhancing the sidewalk. Low-maintenance plants were selected to thrive in these microclimates and do not require irrigation. Features include reclaimed vintage granite cobbles from San Francisco streets used as edgers and Calstone permeable pavers at walkways (except at Jersey Street location; both materials available at Broadmoor Landscape Supply). Short lengths of bamboo poles are used to deter trampling. This is an effective, low-maintenance and low-cost alternative to fencing. These sidewalk gardens were created by using the Sidewalk Landscaping Permit available through SFDPW to any property owner.

76 Jersey Street (accessible by J-Church MUNI) – microclimate ‘mixed sun/shade’

82 Jersey Street (accessible by J-Church MUNI) – microclimate ‘mixed sun/shade’

1117 Church Street (visible from J-Church MUNI) – microclimate ‘afternoon full sun’

4263 26th Street – microclimate ‘mixed sun, shade, wind’

682 Douglass Street – microclimate ‘morning sun, wind’

Before (82 Jersey Street)

After (82 Jersey Street)
