

PLANT*SF GRANT-SUPPORTED SIDEWALK LANDSCAPING

In Noe Valley well-designed sidewalk gardens can not only make our streetscapes more beautiful but also help reduce rain loads on the sewer system. Plant*SF is offering a limited number of professionally designed grant-supported demonstration sidewalk landscaping gardens in Noe Valley. Gardens feature low-maintenance native and climate-adapted plants appropriate to pedestrian areas and the micro-climate.

Selected properties will contribute volunteer hours tailored to each participant, \$750 and ongoing maintenance. All other costs (design, permitting, materials, installation) are covered by the grant.

To have a property be considered for grant-supported sidewalk landscaping, interested parties should email their contact information and property address to info@PlantSF.org by **5pm Monday, February 7, 2011**.

See www.plantSF.org for examples of sidewalk gardens.
