

PERMEABLE LANDSCAPE AS NEIGHBORHOOD TREASURE  
**SUSTAINABLE PUBLIC SPACE PLANTINGS**

- STORMWATER DIVERSION** - Directs rain into planting areas instead of the sewer system; increases tree canopy.
- WATER CONSERVATION** - Uses native and climate adapted plants; requires no irrigation once established.
- COMMUNITY ENHANCEMENT** - Beautification and safety through neighbor-based stewardship projects.
- ABUNDANCE BY DESIGN** - Emphasis on plants for self-propagation, habitat, forage, pollination and food.
